Modular Downlight with Ultra Flexible Angle Designs

MEGAMAN® proudly introduces the all-new MALCOLM, a family of recessed downlights offering ultra flexible angle adjustment and various modular choices. The lamp shade of MALCOLM can be adjusted freely, allowing a group of downlights to create a seamless light beam for an extensive area.

Available in single circular and square planes, as well as two-head and three-head rectangular planes, MALCOLM delivers brilliant light output with either CFL or LED reflectors from MEGAMAN® to illuminate either a confined or spacious area. In addition, there is a slot for adjusting the position of the lamp holder catering for the use of CFL or LED which have different lengths.

Product Features:

- Replaces halogen recessed downlights
- Works perfectly with CFL or LED reflector lamps
- Highly flexible angle adjustment: 330° horizontal rotating and up to 40° vertical titling*
- Various models available: single circular and square planes; two-head and three-head rectangular planes
- Models available for PAR16 and PAR30 reflectors#
- Plane made of aluminium. Lamp shade made of polycarbonate (PC) to make it safe to touch and adjust angle during operation.
- Colours available: BK23 / WH24 / SV26 / GD23

* 30° vertical titling for models with GU10 lamp holder; 40° vertical titling for models with E27 lamp holder
\# Models available for PAR16 with E14 lamp holders are coming soon

Applications:
- Shops and boutiques
- Department stores
- Restaurants
- Lounges
- Exhibition booths

Adjustable lamp holder position to fit with CFL or LED lamp

Simply adjust the tab to the lower position on the slot when fitting with a smaller lamp, or to the upper position for a bigger lamp.

The increased flexibility caters for different light sources.

Tab at upper position   Tab at lower position
